

Tatted Fall Leaves

The following patterns for leaves were created by request. There are 4 different designs and they can be tatted with either a needle or shuttle. CTM method for shuttle. I used size 10 thread for my leaves so of course if you use smaller thread yours will be smaller.

Leaf #1 (STAR LEAF) Approximately 2" in length

Leaf #2 (SWOOP LEAF) Approximately 1 3/4" in length

You will notice in the scan that the 2nd leaf is not joined. I couldn't decide which one I liked best. The alternate rings for the 2nd leaf are in (parenthesis).

Leaf #4 (CURLED LEAF) Approximately 2" in length and 1 1/2" wide

This leaf will try to misbehave during tatting it will curve one way and then during the last line of tatting curve the other way. So don't get too frustrated with it.

From here to the end there are 2 chains with quite a few joins.

CH: 3-3+(p on ring)3-3+(p of join)4-4(p of join)5-5+(p of join)6-6+(p of join)7-7+(beginning) rw

Right now you are curved to the right (or at least mine is) now with this last row of chain you will curve to the left (mine did any ways)
